

HARUN HASAGIĆ

PROFILE

IT graduate from the Faculty of Science and Mathematics, University of Sarajevo, with practical experience in full-stack development using Next.js, React, Node.js, Express, FastAPI, and PostgreSQL. Passionate about learning and building real-world applications that connect frontend and backend technologies. Additionally, I have gained basic networking experience through university projects involving network interface configuration, DNS, DHCP, and router setup. Currently seeking an entry-level software development opportunity where I can apply my technical skills, contribute to meaningful projects, and continue growing as a software developer.

PROJECTS

Human Resource Management

2025 – Solo project ([harun20035/HRM-Project](#))

- Developed a full-stack Human Resource Management (HRM) web application to streamline the recruitment and employee data management process
- Implemented features for job postings, candidate applications, interview scheduling, and user roles (admin/candidate)
- Built using Node.js, Express.js, PostgreSQL, and EJS templating with custom CSS styling
- Designed a clear distinction between administrator and applicant workflows to ensure transparency and ease of use
- Focused on RESTful routing, and real-world HRM logic implementation

DoZnanja – Online Learning Platform

2025 – Team project (4 members - [harun20035/DoZnanja](#))

- Collaboratively developed a dynamic educational web platform that allows users to create, enroll in, and manage online courses
- Implemented role-based access for students, course creators, and administrators
- Integrated features such as course progress tracking, quizzes, and structured learning steps
- Frontend built with Next.js, backend with FastAPI, and PostgreSQL used for persistent storage
- Worked in a team of 4, using Git and GitHub for version control and coordination
- The backend followed the MVC (Model-View-Controller) architectural pattern to ensure clear separation of concerns and maintainable code structure.

BiH Insight – Android App

2025 – Solo project ([harun20035/BiH-Insight](#))

- Developed a Kotlin-based Android app using Jetpack Compose to access and visualize datasets from the official Open Data Portal of Bosnia and Herzegovina ([odp.iddeea.gov.ba](#))
- Fetches and processes public data via CKAN JSON API
- Implements features like dataset browsing, filtering, offline caching, and interactive chart visualizations
- Focused on building modern, user-friendly mobile UI/UX with Compose and Android best practices

EXPERIENCE

Internship – UTIC Sarajevo

August – September 2025

- Worked on full-stack web development using Spring (Java) for the backend and React for the frontend.
- Participated in team sprints and implemented features following Agile workflow.
- Received a letter of recommendation for dedication and code quality.

Software Development Intern – Rubicon Sarajevo

September – October 2025

- Developed a movie search and details web app using React, Zustand for global state management, and TheMovieDB API for data integration.
- Implemented functionality for top-rated movies/TV shows, live search, and detailed views based on API responses.
- Received a letter of recommendation, available upon request.

EDUCATION

2018 - 2022

HAZIM ŠABANOVIĆ HIGH SCHOOL ,
VISOKO

2022 - 2026

FACULTY OF SCIENCE AND
MATHEMATICS - IT

TECHNICAL SKILLS

- JavaScript, HTML/CSS
- Node.js and Express.js
- Next.js and React
- FastAPI
- PostgreSQL / MySQL
- Git & GitHub
- C++ OOP

SOFT SKILLS

- Team collaboration
- Problem-solving
- Communication
- Continuous learning

LANGUAGES

- English
- Bosnian (native)
